## Executive Summary

- Recent BCA graduate from The American College, Madurai, and a native of Ramanathapuram, with a strong foundation in web development. Proficient in HTML, CSS, and JavaScript, with hands-on experience building responsive applications using React.js. Aspiring frontend developer eager to contribute to your organization's growth while adding meaningful value through my skills and dedication.

## Projects

**Portfolio**                                                                                   Click to view

- Developed a personal portfolio website to showcase my background, technical skills, and projects. It includes a professional home page, an "About Me" section outlining about me and my skills, a dedicated projects page links to live demos, and a contact section for easy communication. Built with modern web technologies such as React and Vite, the site offers a clean, responsive user experience and is hosted on GitHub Pages.
- Tools Used: React js ,Css,Java script

**Edusity University webpage**                                                                  Click to view

- Developed a responsive and dynamic university website featuring key sections such as Home, About Us, Programs, and Contact Us using React.js. Implemented component-based architecture for modular development and seamless navigation. Enhanced user experience with clean UI design and responsive layout using custom CSS.
- Tools Used: React js ,Css,Java script

**Food shopping cart**                                                                          Click to view

- Developed a food shopping cart application that enables users to add food items, modify quantities, and view real-time updates of itemized and total costs. Designed a user-friendly interface to ensure smooth navigation and interaction, enhancing the overall shopping experience through responsive design and accurate cost calculation features.
- Tools Used:React js,css
